PROFESSIONAL SUMMARY

Analytical professional with experience in IT audit, financial services, and cross-functional operations. Currently serving as Product & Business Analyst Lead in an i.c.stars client project, contributing to requirements, workflows, stakeholder communication, and application design.

CORE SKILLS

Requirements gathering • Workflow and process analysis • User stories • Stakeholder communication • Documentation • Microsoft Excel (advanced) • Figma (working knowledge) • SQL (basic) • Jira (basic)

PROFESSIONAL EXPERIENCE

KPMG Poland | Consultant – IT Audit & Assurance | Dec 2021 – Aug 2024

- Analyzed IT-supported business processes and assessed technology risks across client audit engagements.
- Evaluated IT solutions against applicable requirements, internal controls, and recognized good practices.
- Tested business and IT control mechanisms; reviewed evidence and documented audit observations.
- Supported financial statement audit teams through IT-related procedures and large-dataset analysis using Microsoft Excel and KPMG Clara.

Keller Williams / HomeSmart | Real Estate Administrative & Marketing Coordinator | Oct 2024 – Apr 2026; occasional support thereafter

- Supported administrative processes and documentation for 100+ real estate transactions.
- Coordinated work involving up to 7–8 agents and supported 3–5 transactions on busy days.
- Managed follow-ups, schedules, client communications, and transaction documents with agents, attorneys, and other stakeholders.
- Created listing marketing materials, presentations, and social content using Canva and CapCut; worked with MLS and Microsoft Office.

Getin Noble Bank | Customer Service Advisor | Jun 2020 – Oct 2021

- Assisted clients with routine banking transactions, including cash withdrawals and deposits.
- Explained banking products and services, resolved customer inquiries, and provided ongoing account-related assistance.
- Built customer relationships while following bank procedures and maintaining accurate communication.

TECHNOLOGY & CLIENT PROJECT

i.c.stars Chicago | Technology Intern; Product & Business Analyst Lead | Aug–Dec 2026 (in progress)

- Contribute to the Medline Operations Problem Navigator team project by gathering requirements, mapping workflows, preparing user stories, and communicating with stakeholders.
- Help coordinate team deliverables, meetings, presentations, and application design discussions.
- Created test cases, defect logs, and diagrams in training; application testing for the Medline project is planned/in progress.
- Technology training includes SQL, Python, GitHub, VS Code, Figma, Jira, and AI-assisted tools; foundational proficiency in coding and testing tools.
